

Instructions for creating and configuring a Metamask wallet for Vodka Token.

STEP 1. Create and configure a wallet through the MetaMask application.

installation a MetaMask.

Go to the official download page:

<https://metamask.io/download.html>

Select your browser and **click the button “Get Started”** to install the extension. You may need to grant it some permissions before launching.

Creating a wallet

At the beginning, you will see a welcome window.

Click **"Get Started"**. Here you will be prompted to either import the start phrase or create a new one. Click **"Create Wallet"**. On the next page, you will be asked if you would like to send anonymous data to the developers to help improve the application. Choose the option you like best.

Come up with a strong password, check the box and click **"Create"**.

THIS IS VERY IMPORTANT: back up your original phrase!

*** If you do not do this and your computer is lost, stolen or destroyed, you will not be able to recover your wallet without an initial phrase.**

Confirm the phrase and go to the next step. Click **"Ready"** and you will see the wallet interface.

Adding Binance Smart Chain (BSC) to MetaMask.

Open MetaMask wallet. At the top of the main screen, click the **drop-down** list of networks and select the last item, **Custom RPC**.

In the window that opens, fill in the fields in accordance with the text below:

A screenshot of the 'Add Custom Network' form in the MetaMask application. The form has a title 'Networks' and a close button. Below the title is a warning message: 'A malicious network provider can lie about the state of the blockchain and record your network activity. Only add custom networks you trust.' The form contains several input fields: 'Network Name', 'New RPC URL', 'Chain ID' (with an information icon), 'Currency Symbol (optional)', and 'Block Explorer URL (optional)'. Each field is currently empty.

Network Name: **Binance Smart Chain**
New RPC URL: <https://bsc-dataseed.binance.org/>
Chain ID: **56**
Currency Symbol: **BNB**
Block Explorer URL: <https://bscscan.com>

After filling in all the fields, click **Save**.

Step 2: Adding Vodka Token to MetaMask

Before adding Vodka Token, select the network for which you are adding the token in your wallet, in our case it is: **Binance Smart Chain**.

If you have a different network selected, change it:

Then on the main wallet screen, scroll down and you will find the **"Import Tokens"** button.

Click **"Import Token"** and **paste the address** in the address field of the token contract:
Binance Smart Chain:

0x66da5cc445fec38a9475ae7941f89110b9d256b9

The only and original address of the contract (* beware of clones and scammers).

The original address of the contract for trading is also available on the website and in our official groups on Telegram, Twitter and Discord.

Website: <https://vodkatoken.com/>

Telegram: <https://t.me/vodkatoken>

Twitter: <http://twitter.com/VodkaToken>

Discord: <https://discord.gg/G5ECxRju5u>

then click "Next" and confirm the action:

Congratulations, your wallet setup is complete!

To copy the wallet address, click in MetaMask on the block labeled "Account 1"

Now you can buy **Vodka Token**, **BNB**, **BUSD** and other tokens on this wallet.
